“With Neto we got our hands on enterprise level customisation at a SME price point. It’s groundbreaking technology that’s not only cost effective; it’s far more powerful than the competition because it is the first e-commerce solution to include an inventory management system.

- *Jonathon Allara, Bicycles Online*

70% IMPROVED EFFICIENCY

Neto automates repetitive tasks and integrates with multiple sales channels to manage orders and shipments. Stop working in your business and start working on your business.

WHAT SETS NETO APART?

- You're passion is with your business, not integrating different technologies. So Neto has done that for you. Everything you need to grow your retail empire is at your fingertips.
- It's all about your customer. Our single customer view means you have everything you need in the one place to give your customers an exceptional experience
- Get access to priority partner support from our Australian based team, consisting of over 120 staff, who all understand the Australian retail environment.

POWERFUL AUSTRALIAN INTEGRATIONS

Instead of relying on undependable third-party plugins like our competitors, all of our integrations are built in-house by Neto staff. We pride ourselves on the fact that we're at the forefront of the Australian retail industry so we can offer integrations with the technology that our retailers need.

“I love that Neto is constantly being developed – they ask us what we need and then deliver it quickly. It’s their customer support sets them apart because Neto are happy to be held accountable. In the world of online retailing that’s essential, because if your website goes down it’s not only sales you lose, it’s your reputation too.”

- Julie Mathers, Flora & Fauna
